

Sprint 4 Report

OneApp

Team OneApp

12/03/17

Nathan Phan, Manav Sharma, Yona Edell, Hesham Assabahi

**ACTIONS TO STOP DOING:** The team should utilize the stand up meetings to completely fill in other members on progress of their work so no work will be overlapped during the next stand up meeting.

**ACTIONS TO START DOING:** If team members are working on similar tasks, they should communicate with the entire team on their progress, not just the team members they are working with. The team members should also create a new branch every time a new task is picked up to prevent overlapping code or merge conflicts.

**ACTIONS TO KEEP DOING:** Delegations of tasks seem to be fair and proper. Everyone picks up tasks that they are able to complete in a sprint/ scrum meeting interval.

**WORK COMPLETED/ NOT COMPLETED:** There were 2 User Stories for this sprint

**User Story 1:** As a User I would like to link my Facebook account

- **Task 1:** Implement Facebook SDK [3 hours]
- **Task 2:** User build in login function to link Facebook [4 hours]

**User Story 2:** As a user I want to be able to read my Facebook timeline

- **Task 1:** Grab timeline through API [6 hours]
- **Task 2:** Display timeline on front end [4 hours]

All user stories were completed fully.

**WORK COMPLETION RATE:** The number of user stories completed was two out of two. There was a total of 14 days in this sprint which comes out to about 0.14 user stories per day. The estimated number of ideal work hours was 17. We finished in about 15 hours.
